

Driving California Wine 6: Matthiasson Wine

By **Hawk Wakawaka** - Jun 26, 2012

Steve and Jill Klein Matthiasson focus on sustainable agriculture in both vineyards, and farming more generally, while also making wine for their own [Matthiasson label](#). We were lucky enough to taste with them, and hear more about their work in vineyards and with farmers. In the following photos the various plants shown are purposefully grown along grape vines for the support they provide to vineyard supporting insects, and birds. Write up to follow. In the meantime, here are some photos from the visit.
